

Gayton School Build Update

I expect that the Parish Council and community may be interested in an update on the building project.

I am sure people are aware we have cleared the site and there has been archaeological trenching. These were works outside of the main contract.

We have appointed Kier Builders from the NCC Framework to undertake the main works, and the first thing they have to do is to place an order with UKPN to divert the overhead power line. This is currently underway. In the same immediate period will be an application for the Public Right of Way temporary diversion.

As with all contractors from our Framework, Kier will be writing to the neighbours in the next few weeks as things get underway to provide contact details and regular updates and I will ensure that the PC is included in this communication.

Kind regards

Isabel
